

XM Radio is very useful to me. I go on a lot of road trip and travel around the country a bit. XM Radio let's me put on one station and I can listen to it from San Francisco to New York. No more seraching for that one perfect station. XM Radio also lets me listen to what I want, not the same old stuff on FM stations. Please keep XM Radio's traffic and local stations, it helps out when you need to get through town fast.
